

System Management - Batch Result Management

Overview

Batch Result Management provides a function to register the batch result that is executed regularly.

Description

- **Batch Result Management** provides functions of registering, modifying, deleting, inquiring and inquiring lists of batch results.

① Batch result registration: inquire information defined as batch result in the order of registration time and display the results on the screen.

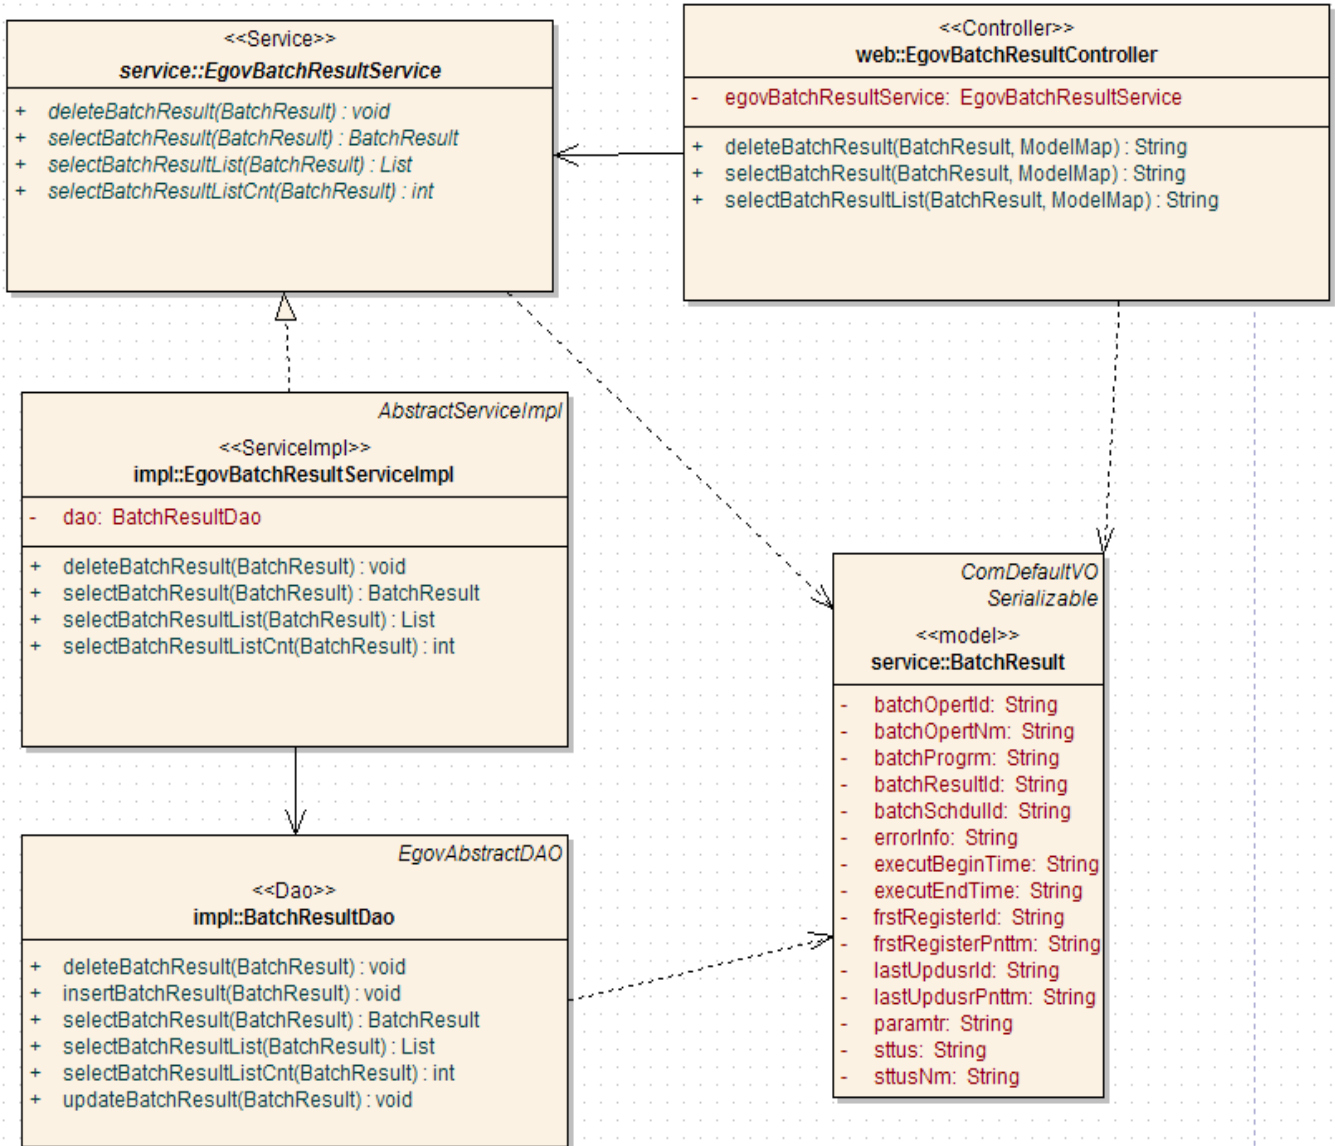

④ Batch result deletion: delete registered batch result information.

⑤ Batch result inquiry: inquire registered batch result information.

Related Tables

Table name	Table name (English)	Note
Batch result	COMTNBATCHRESULT	Define and manage the property information to manage batch result information.

ID Generation

- In order to use ID Generation Service, add **BATCH_RESULT_ID** to COMTECOPSEQ, the sequence storing table.

INSERT INTO COMTECOPSEQ VALUES('BATCH_RESULT_ID','0');

Related Screen and Execution Manual

Batch result list inquiry

Action	URL	Controller method	QueryID
Inquire	/sym/bat/selectBatchResultList.do	selectBatchResultList	"BatchResultDAO.selectBatchResultList"

Inquire /sym/bat/selectBatchResultList.do selectBatchResultList "BatchResultDAO.selectBatchResultListCnt"

10 batch result lists are retrieved per page and paging is carried out every 10 page. The search conditions are batch task name and batch schedule ID.
