

Board Utilization

Summary

Provide the function to manage the utilization information of board created through Board Creation Management function.

Description

Package Dependency

Board package has direct functional dependency to the common package (cmm) and system package(sim) of element technology as well as format/calculation/conversion package. However, it forms the deployment file together with common function(com) of cooperation, design template and calendar package according to dependency between packages so as to be executed without error during component deployment.

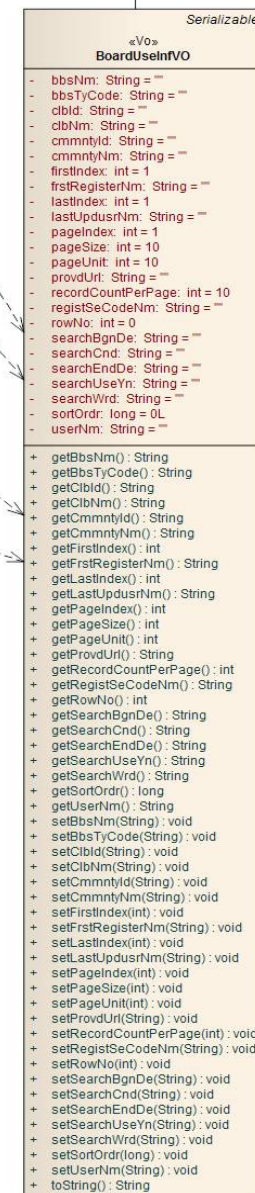

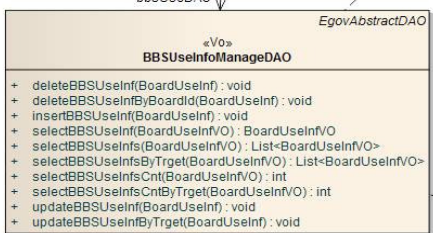

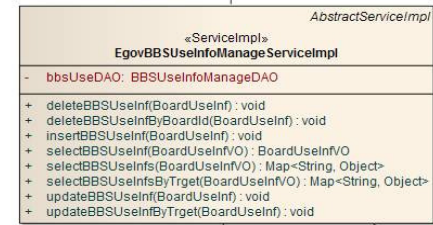

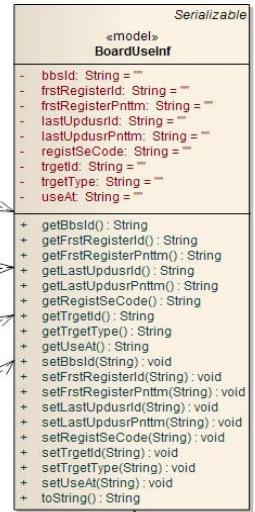

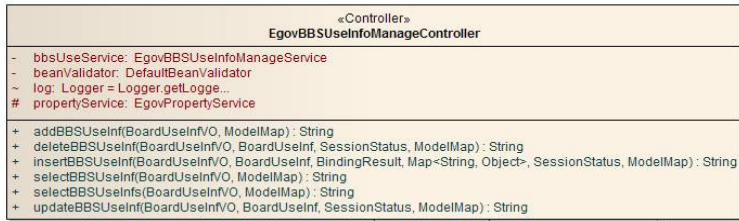

- Package Dependency: [Board, Community, Society Package Dependency](#)
