Common Service - Club Template

Summary

The club template provides the functions that can design elements such as main screen for clubs.

Description

The club template should be designated when creating a club and uses the club management function to change to another template. The template management functions such as registering or deleting a template is provided separately.

Related sources

The sources related with the template management functions are the common items of board, community and club template. Refer to **Board Template.**

Manual

Template management

The template management (register/modify/list inquiry) is applied in common to the boards, communities and clubs. Refer to the following.

- Template list inquiry: **Template list inquiry** of board template
- Template registration: **Template registration** of board template
- Template modification: **Template modification** of board template

Default club template

The following is the default club template path.

`/cop/com/template/EgovClbBaseTmpl`

※ Keep in mind that there is no ".jsp" at the end

In the default template, register information as in the following.

Or you can register directly in DB as in the following.

```
INSERT INTO COMTNTMPLATINFO
(TMPLAT_ID, TMPLAT_NM, TMPLAT_SE_CODE, TMPLAT_COURS, USE_AT, FRST_REGISTER_ID, FRST_REGISTER_PNTTM )
VALUES
('TMPLAT_CLUB__DEFAULT', 'club default template', 'TMPT03', '/cop/com/template/EgovClbBaseTmpl',
'Y', 'SYSTEM', SYSDATE)
```

Utilization of club template

The following club templates are provided by default. You can create and register new templates from them.

```
.../WEB-INF/jsp/egovframework/cop/com/template/EgovClbBaseTmpl.jsp
.../WEB-INF/jsp/egovframework/cop/com/template/EgovClbBaseTmplContents.jsp
```

The followings are the models and VO (ValueObject) information used in JSP. Using JSTL type EL(Expression Language) is recommended.

* EgovClbBaseTmpl.jsp

Model(VO)	Property	Information	Sample	Notes
clubVO	clbNm	Club name	`<title><c:out value='${clubVO.clbNm}' /></title>`	
	clbId	Club ID	`<c:out value='${clubVO.clbId}' />`	
	cmmntyId	Community ID	`<c:out value='${clubVO.cmmntyId}' />`	
	clbIntrcn	Club introduction	`<c:out value='${clubVO.clbIntrcn}' />`	
clubUser	oprtrAt	manager	`<c:if test="${clubUser.oprtrAt == 'Y'}">`	'Y' or other
	useAt	use	`<c:when test="${clubUser.useAt=='Y'}">`	'Y' or other
bbsList		board name	`<c:forEach var="bbs" items="${bbsList}" varStatus="status">`	Provide four names
	bbsNm	board ID	`<c:out value="${bbs.bbsNm}" />`	
	bbsId	board property code	`<c:out value="${bbs.bbsId}"/>`	
	bbsAttrbCode	board type code	`<c:out value="${bbs.bbsAttrbCode}"/>`	valid, gallery, general
	bbsTyCode	board name	`<c:out value="${bbs.bbsTyCode}"/>`	general, anonymous, notice, guest book
preview		Preview	`<c:when test="${preview == 'true'}">`	'true' or other
isAuthenticated		authentication	`<c:if test="${isAuthenticated=='Y'}">`	'Y' or other

* EgovClbBaseTmplContents.jsp

Model(VO)	Property	Information	Sample	Notes
preview		preview	`<c:when test="${preview == 'true'}">`	'true' or other
bbsList		board List		
	bbsNm	board name	`<c:out value="${bbsList[0].bbsNm}" />`	
	bbsId	board ID	`<c:out value="${bbsList[0].bbsId}" />`	
	bbsAttrbCode	board	`<c:out value="${bbsList[0].bbsAttrbCode}"/>`	valid, gallery,

		property code		general
	bbsTyCode	board type code	`<c:out value="${bbsList[0].bbsTyCode}"/>`	general, anonymous, notice, guest book
articleList		post List	`<c:forEach var="article" items="${articleList[0]}" varStatus="status">`	
	frstRegisterPnttm	Registration date	`<c:out value="${article.frstRegisterPnttm}" />`	
	bbsId	board ID	`<c:out value="${article.bbsId}" />`	
	nttId	Post ID	`<c:out value="${article.nttId}" />`	
	nttSj	Post title	`<c:out value="${article.nttSj}" />`
