

Common Class Code

Summary

Common class code management provides the function to register, update, inquire list and inquire details of common class code.

Description

Package Dependency

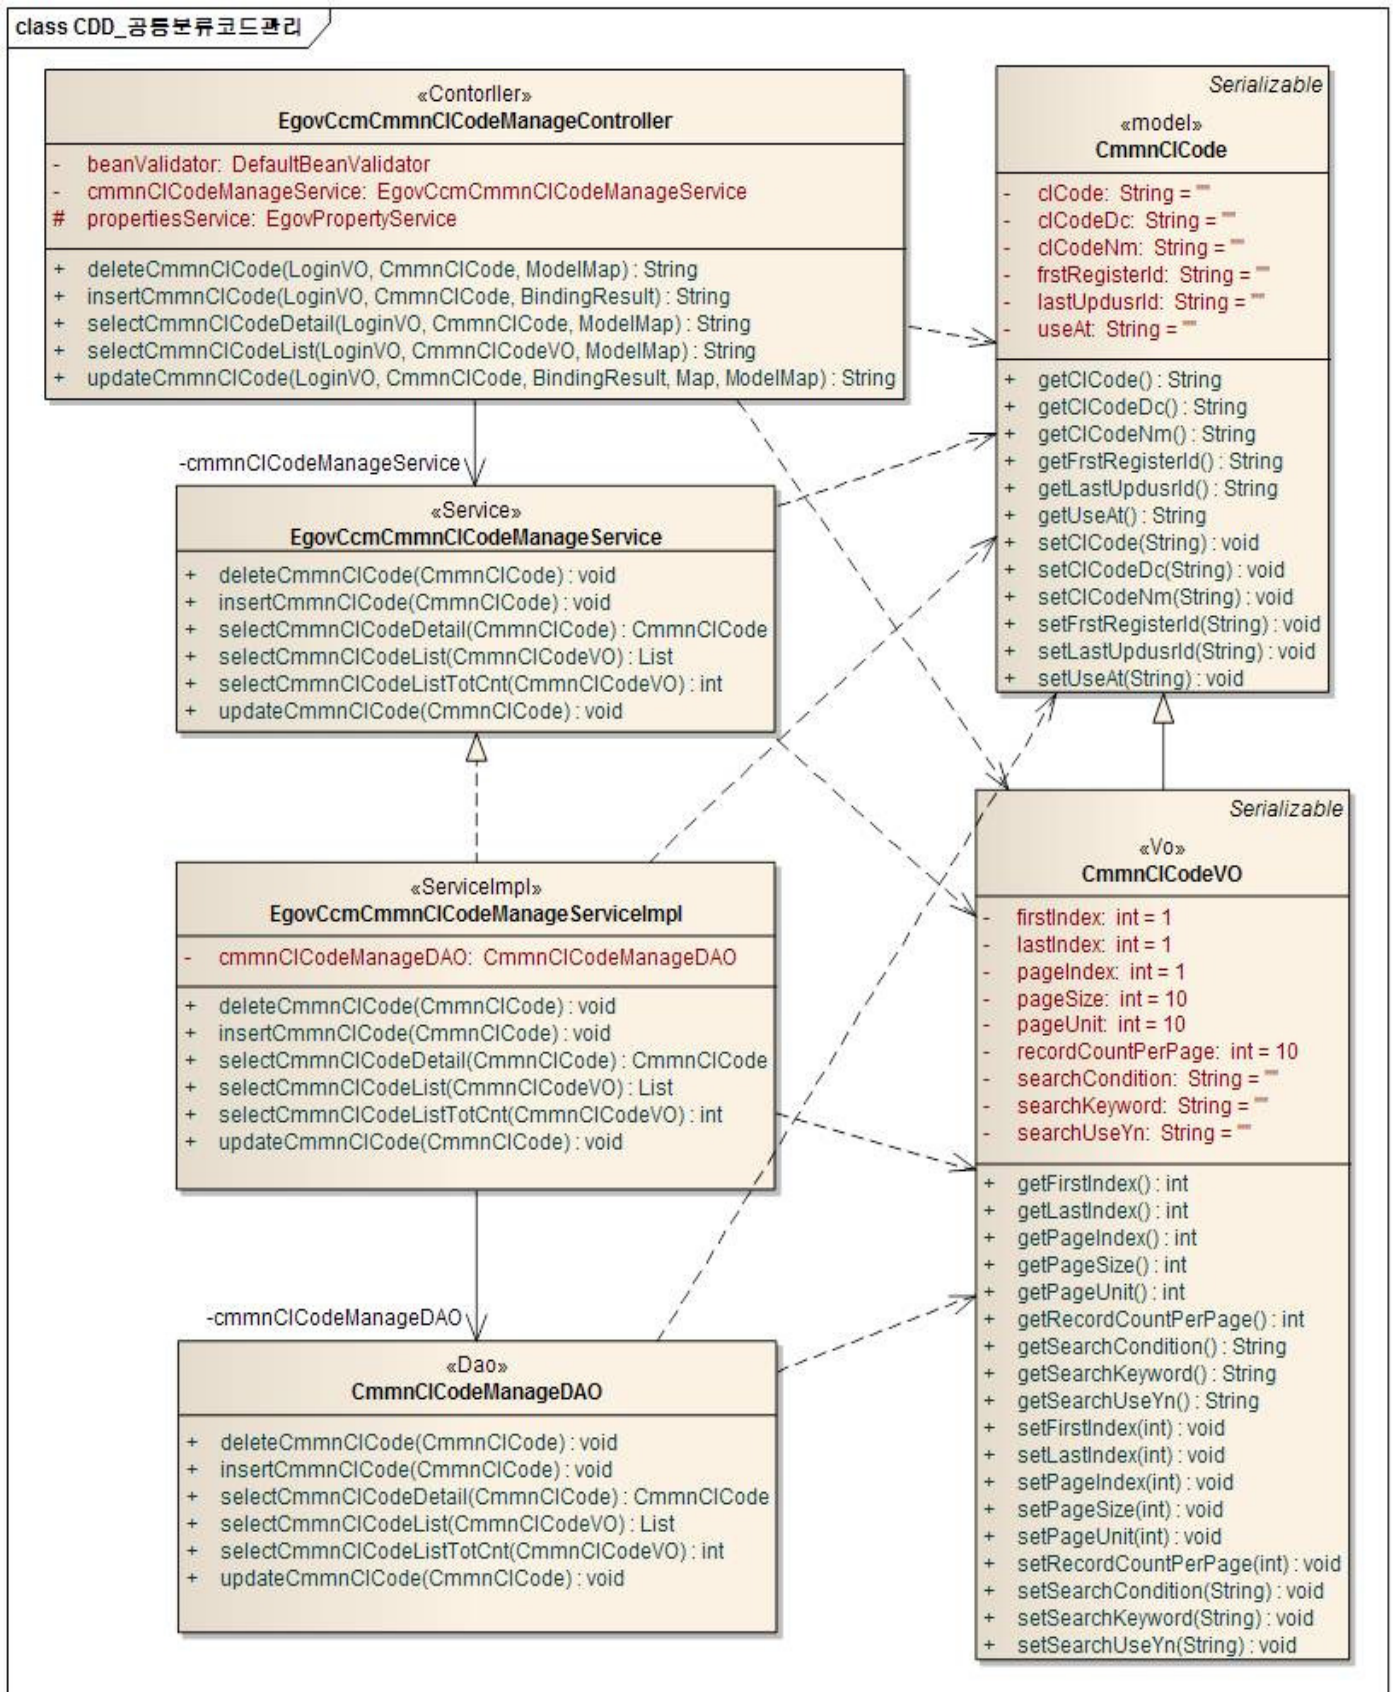

Common class code management package has direct functional dependency to the common package (cmm) of element technology only. However, it forms the deployment file together with common detail code management, common code package according to dependency between packages so as to be executed without error during component deployment.

Related Function

Common code class is composed of **Common code class list inquiry**, **Common code class registration**, **Common code class update**, **Common code class detail inquiry** function.

Common code class list inquiry

Business Rule

Common code class list is inquired by 10 items per page. The paging consists of 10 pages. The condition of search is implemented by class code and class code name.

Related Codes

N/A

Screen and execution manual

Action	URL	Controller method	QueryID
List inquiry	/sym/ccm/ccc/EgovCcmCmmnCICodeList.do	selectCmmnCIcodeList	"CmmnCIcodeManageDAO.selectCmmnCIcodeList",
			"CmmnCIcodeManageDAO.selectCmmnCIcodeListTotCnt"

To change the scope of search per page, change pageUnit, pageSize of context-properties.xml file(provided, however, that relevant setting affects the overall common service function.)
