

Community Member Management

Summary

Community member management provides the function to manage community members such as application, approval and withdrawal of user.

Description

Package Dependency

Community package has direct functional dependency to the common package (cmm) of element technology, format/calculation/conversion package., common function (com) package of cooperation, board package and society package. However, it forms the deployment file together with design template, system(sim) and calendar package according to dependency between packages so as to be executed without error during component deployment.
