

## **Common Service - Community Template**

### **Summary**

The community template provides the functions that can design elements such as main screen for communities.

### **Description**

The community template should be designated when creating a community and uses the community management function to change to another template. The template management functions such as registering or deleting a template is provided separately.

### **Related sources**

The sources related with the template management functions are the common items of board, community and club template. Refer to [Board Template](#).

### **Related tables**

The tables related with the template management functions are the common items of board, community and club template. Refer to [Board Template](#).

### **Environmental settings**

N/A

### **Manual**

#### **Template management**

The template management (register/modify/list inquiry) is applied in common to the boards, communities and clubs. Refer to the following.

- Template list inquiry: [Template list inquiry](#) of board template
- Template registration: [Template registration](#) of board template
- Template modification: [Template modification](#) of board template

---

### **Default community template**

The following is the default community template path.

/cop/com/template/EgovCmmntyBaseTpl

※ Keep in mind that there is no ".jsp" at the end.

In the default template, register information as in the following.

**템플릿 정보등록**

템플릿명 *	커뮤니티 기본템플릿
템플릿 구분 *	커뮤니티템플릿 <input type="checkbox"/> 템플릿은 JSP만 가능합니다.
템플릿경로 *	/cop/com/template/EgovCmmntyBaseTpl
사용여부 *	Y: <input checked="" type="radio"/> N: <input type="radio"/>

Or you can register directly in DB as in the following.

```

INSERT INTO COMTNTMPLATINFO
(TMPLAT_ID, TMPLAT_NM, TMPLAT_SE_CODE, TMPLAT_COURS, USE_AT, FRST_REGISTER_ID,
FRST_REGISTER_PNTTM )
VALUES
('TMPLAT_CMNTY_DEFAULT', 'community default template', 'TMPT02',
'/cop/com/template/EgovCmmntyBaseTpl',
'Y', 'SYSTEM', SYSDATE)

```

### Utilization of Community template

The following community templates are provided by default. You can create and register new templates from them.

```

.../WEB-INF/jsp/egovframework/cop/com/template/EgovCmmntyBaseTpl.jsp
.../WEB-INF/jsp/egovframework/cop/com/template/EgovCmmntyBaseTplContents.jsp

```

The followings are the models and VO (ValueObject) information used in JSP. Using JSTL type EL(Expression Language) is recommended.

\* EgovCmmntyBaseTpl.jsp

Model(VO)	Property	Information	Sample	Notes
cmmntyVO	cmmntyNm	community name	<title><c:out value='\${cmmntyVO.cmmntyNm}' /></title>	
	cmmntyId	community ID	<c:out value='\${cmmntyVO.cmmntyId}' />	
	cmmntyIntrcn	community introduction	<c:out value='\${cmmntyVO.cmmntyIntrcn}' />	
cmmntyUser	mngAt	manager	<c:if test='\${cmmntyUser.mngAt == 'Y'}'>	'Y' or other
	useAt	use	<c:when test='\${cmmntyUser.useAt == 'Y'}'>	'Y' or other
bbsList		board List	<c:forEach var='bbs' items='\${bbsList}' varStatus='status'>	
	bbsNm	board name	<c:out value='\${bbs.bbsNm}' />	
	bbsId	board ID	<c:out value='\${bbs.bbsId}' />	
	bbsAttrbCode	board property code	<c:out value='\${bbs.bbsAttrbCode}' />	valid, gallery, general
	bbsTyCode	board type	<c:out value='\${bbs.bbsTyCode}' />	general,

		code		anonymous, notice, guest book
clubList		Club List	<c:forEach var="club" items="{clubList}" varStatus="status">	
	clubId	Club ID	<c:out value="{club.clubId}"/>	
	clubNm	Club name	<c:out value="{club.clubNm}"/>	
preview		Preview	<c:when test="{preview == 'true'}">	'true' or other
isAuthenticated		authentication	<c:if test="{isAuthenticated=='Y'}">	'Y' or other

\* EgovCmmntyBaseTplContents.jsp

<b>Model(VO)</b>	<b>Property</b>	<b>Information</b>	<b>Sample</b>	<b>Notes</b>
preview		preview	<c:when test="{preview == 'true'}">	'true' or other
bbsList		board List		
	bbsNm	board name	<c:out value="{bbsList[0].bbsNm}"/>	
	bbsId	board ID	<c:out value="{bbsList[0].bbsId}"/>
