

## Create Files

### Summary

It provides a common function to create files, if necessary, while processing the business logic.

This function is included in the Egovframework common component element technology.

### Description

- ① Function to create files (The created files are in text formats.)

### Related Sources

Type	Corresponding Sources	Description	Remarks
Service	egovframework.com.utl.service.EgovFileTool.java	An element technology class on the file management tool	
JSP	WEB_INF/jsp/egovframework/cmm/utl/EgovDrctryCreate.jsp	A test page	

### Method

Output	Method	Description	Details
String	createNewFile(String fileCreationPath)	Creating files	Receiving a target file path (fileCreationPath) to create a file. If successfully executed, it returns to the created absolute path, and if not, to blank.

### Input

- fileCreationPath: Target directory path to be created that includes a string- type absolute path (ex. /product/jeus/egovProps/tmp/file1.txt)

### Output

- String type: The created file path

### Environmental Settings
