

User Support - Event Application Management

Overview

Event Application Management registers and manages event information such as event classification, event name, event purpose, event host/organizer, event venue, event period and application submission period, participation fee and capacity application.

Description

- **Event Application Management** provides functions of registering, modifying, deleting, inquiring and inquiring lists of event applications.

① Event management list: inquire event management information in the order of registration time and display the results on the screen.

② Event registration: register event information and inquire results.

③ Event modification: modify event information.

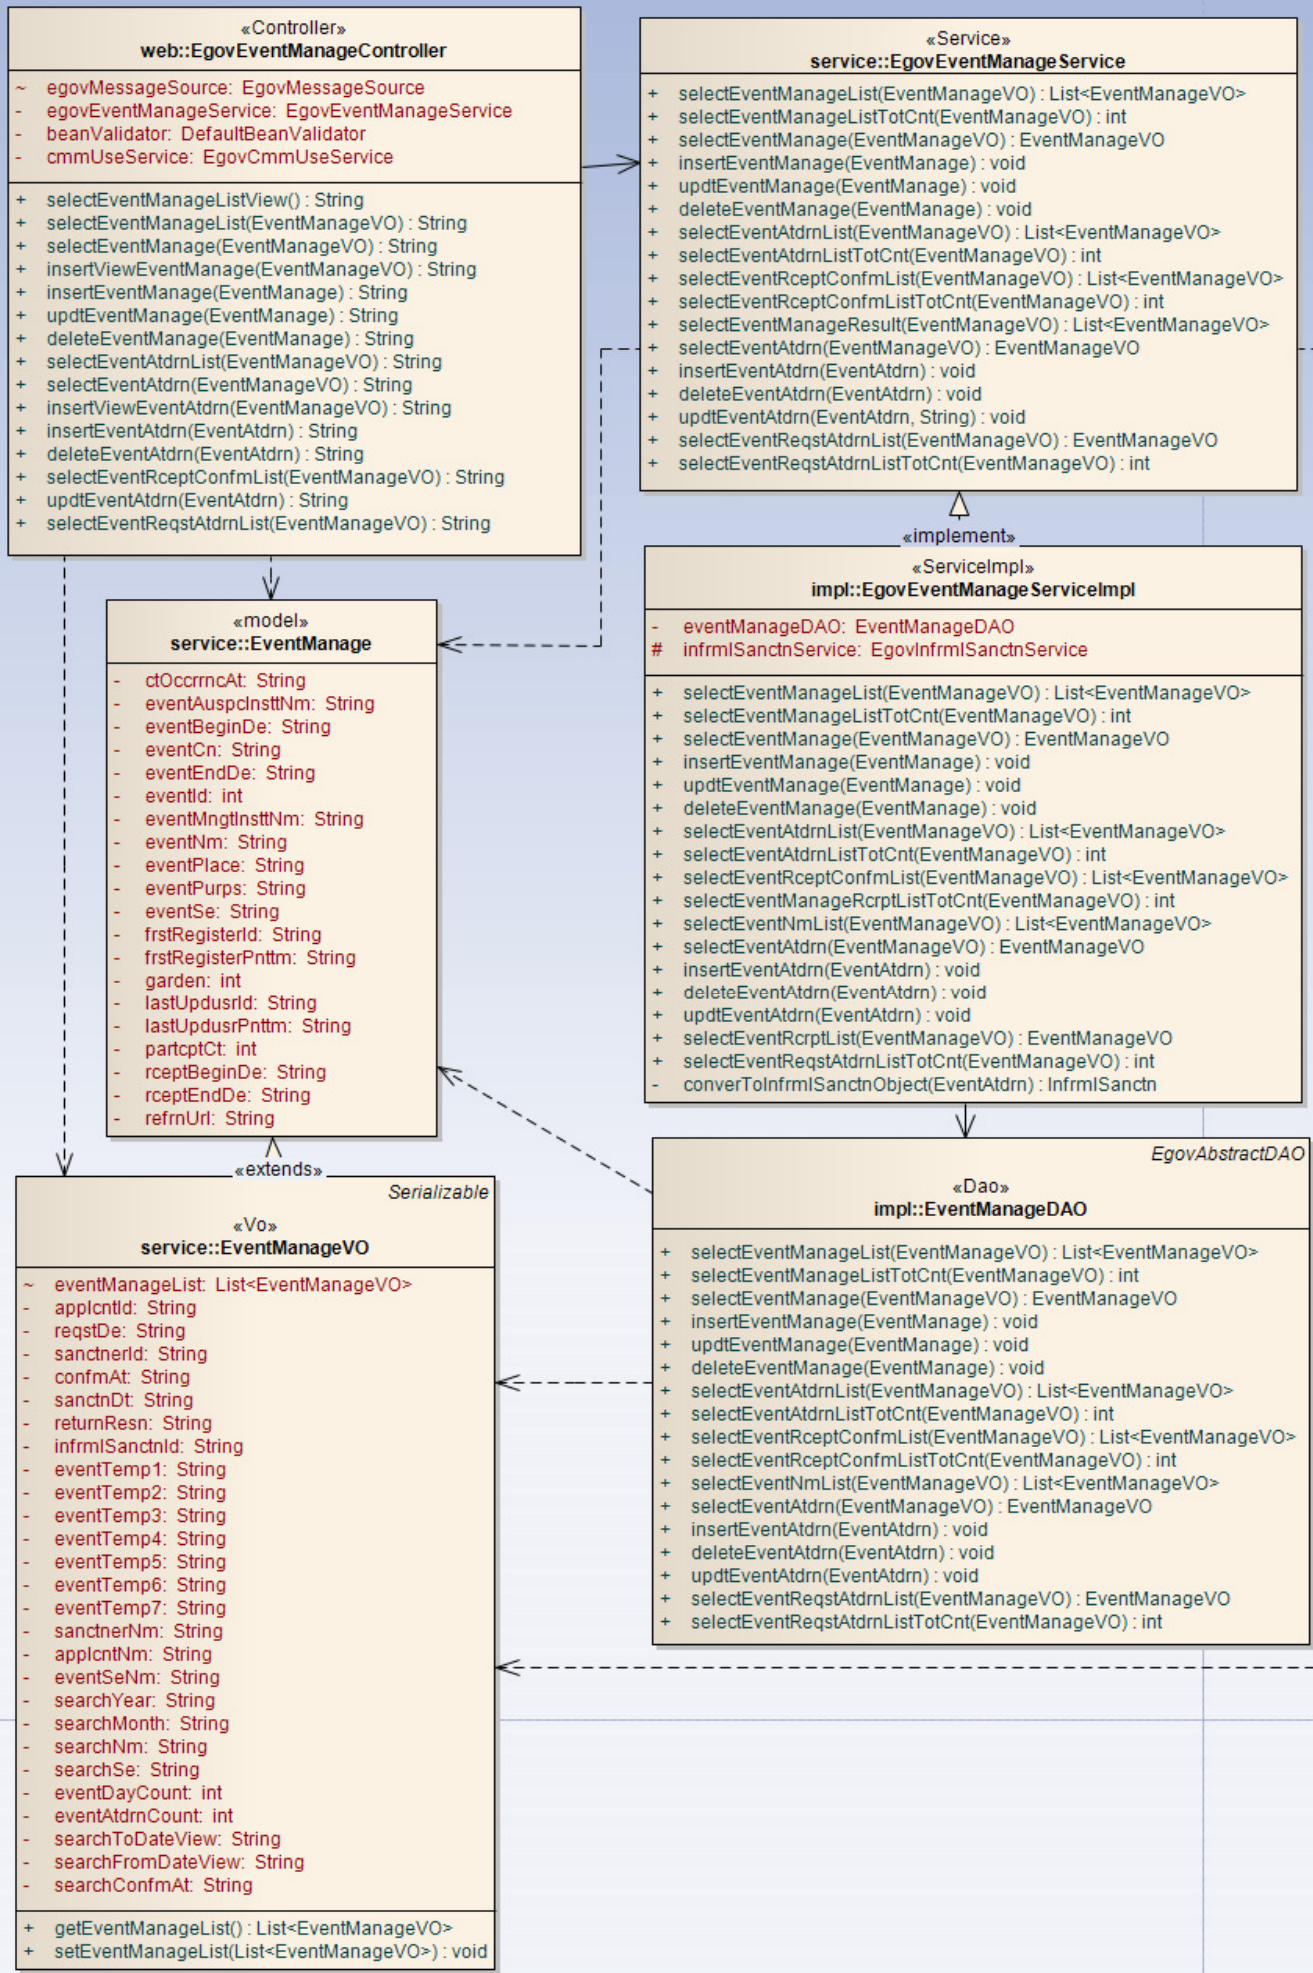

④ Event deletion: delete registered event information.

⑤ Event detail inquiry: inquiry registered event detail information.
