**Program Management**

**Summary**

Program Management is comprised of program list management and program change management. For the program list management, menu is comprised of the screen which manages program list, and it is registered by checking the name of program registered in the program list during the menu registration since it is connected to the menu management as an essential element, therefore, program list shall be defined prior to the menu registration. Program change management is defined with the screen which manages the processing of the state of reflection through the confirmation of the change request from the program change management screen by the system administrator.

- Flow of functions

- Flow of program management function

| Name of function | Flow of function |
|---|---|
| Program list management | ID/password input → Login request → **Program list inquiry** → **Program list registration** → Program list detailed inquiry |

- Flow of program change management function

| Name of function | Flow of function |
|---|---|
| Program change request | ID/password input → Login request → **Program change request inquiry** → **Program change request registration** → Change request item registration→ Program change request detailed inquiry |
| Program change request processing | ID/password input → Login request → **Program change management inquiry** → **Program change detailed inquiry** → Registration of program change request processing item → Automatic mail sending of program change request processing item |

**Description**

For program change request, list management for program change is defined with the screen which requests reflection to system of the changing item of program registered at the program list from the administrator. Program change history is the screen to inquire the history of processing results and so forth in accordance with the program change request, and it is comprised of the program change history list, and program change history detailed screen.

**Package Dependency**

Program Management Package has direct functional dependency for the common package (cmm) of element technology and mail connection interface package. However, in order to be executed without error during the component distribution, the distribution file is constituted with mail connection interface, shortcut menu management, menu creation management, site map, menu management, format/date/calculation, system (sim), calendar, web editor, and postal number package in accordance with the dependency between packages.

- Dependency between packages :   [System management Package Dependency](#)
