Receive Institution Code

Summary

Receive Institution Code receives **institution code** and **legal dong code** through EDI module, reflect it in the operation system and manage the connection details.

Precondition

To use the function to receive Institution Code, consult with the institution in charge of connected service separately and apply for such service.

Service application process is as follows:

① Discuss receipt of institution code with administration standard code management system (http://code.gcc.go.kr)
② Fill out and submit administration standard code connection application (http://code.gcc.go.kr Q&A » FAQ » no. 6 post)
③ Apply for GPKI server application for connecting relay system to administration information authentication center
④ Administration information relay system (administration information sharing delegate) and EDI connection
⑤ Fill out and submit the application to use joint use relay system of administration information.
⑥ Proceed test after receiving EDI module

- Application of each institute for connection should be directly applied by the person in charge.
- Institute code relay system can be applied for connection at administration network only
- Connection with institute code relay system enables connection of **Institute Code**
