

Reply Management

Summary

Provide the function to write the reply for the post registered at the board. Reply management is operated based on **Manage Board Creation** function.

- Function Flow

Description

Designate the additional option to the board created through post management in order to use the post for replying. Additional options can be selected for reply management and satisfaction examination, and cannot be updated once it is designated. Provided, however, that the initial setting is possible in case of existing board not established.

Package Dependency

Reply management package has direct functional dependency to the common package (cmm) of element technology only. However, it forms the deployment file together with format/calculation/conversion, common function(com) of cooperation, design template, system(sim) and calendar package according to dependency between packages so as to be executed without error during component deployment.

Related Table

| Table Name | Table Name (English) | Remarks |
|------------|----------------------|---------------------------|
| Reply | COMTNCOMMENT | Manage reply information. |

Related Function

Reply management is composed of **Reply List Inquiry, Registration, Reply Update and Deletion** function.

Reply List Inquiry and Registration

Business Rule

Inquire the post list of board with reply function.

Related Codes

N/A

Screen and execution manual

| Action | URL | Controller method | QueryID |
|--------------|-------------------------------|-------------------|--------------------------------------|
| List Inquiry | /cop/cmt/selectCommentList.do | selectCommentList | "BBSCommentDAO.selectCommentList", |
| | | | "BBSCommentDAO.selectCommentListCnt" |
| Registration | /cop/cmt/insertComment.do | insertComment | "BBSCommentDAO.insertComment" |

Reply list is inquired by 10 items per page. The paging consists of 10 pages. To change the scope of search per page, change pageUnit, pageSize of context-properties.xml file.(provided, however, that relevant setting affects the overall common service function.)
