

Common Service – Society Management Function

Summary

Society management function provides the function to create the society and to manage the property information for the registered society.

Description

Society management is provided through separate management function. Some functions are provided through relevant management menu, but society management function is possible with management function available in the society.

Package Dependency

Community package has direct functional dependency to the common package (cmm) of element technology, format/calculation/conversion package. However, it forms the deployment file together with common function(com) of cooperation, community, design template, system(sim), calendar and society package according to dependency between packages so as to be executed without error during component deployment.

- Package Dependency: [Board, Community, Society Package Dependency](#)
