Send and receive log	COMTNTRSMRCVLOG	Information for send and receive log

Related Functions

Connection status management is comprised of **connection status list inquiry, detailed inquiry** functions.

System status list inquiry

Business Rule

Connection status list is inquired with the unit of 10 cases per page, and paging is realized with the unit of 10 pages.

Search condition is performed for the connection status name.

Related Code

N/A

Screen and execution manual

Action	URL	Controller method	QueryID
List inquiry	/ssi/syi/ist/getCntcSttusList.do	selectCntcSttusLogList	"CntcSttusDAO.selectCntcSttusList"
			"CntcSttusDAO.selectCntcSttusListTotCnt"

In the case of changing the search range per page, change the pageUnit, pageSize of context-properties.xml file. (However, corresponding setup exerts influence to the entire common service functions.)
