Registration of Annual Leave

Action	URL	Controller method	QueryID
Register	/uss/ion/yr/EgovIndvlyrycRegist.do	insertIndvlyrycManage	“indvlyrycDAO.insertIndvlyrycManage”

Register after specifying the properties of the annual leave(current annual leave, used annual leave).

Remaining annual leave is automatically calculated and saved by deducting used annual leave from current annual leave.

Registration and modification of annual leaves may only be performed by individual accounts.

When a leave is registered/modified, the current year is automatically saved as the respective year.
