

Element Technology – Confirmation Message

Summary

It provides a common function to check the confirmation message.

Description

The message information classified as ‘confirm’ goes through a property process.

Related Sources

Type	Corresponding Source	Description	Remarks
Service	egovframework.com.utl.cas.service.EgovMessageUtil.java	A utility related to the message processing	
Controller	egovframework.com.utl.fcc.web.EgovComUtilTestController.java	A controller for testing	
JSP	/WEB-INF/jsp/egovframework/cmm/utl/EgovMessage.jsp	A test page	

Method

Output	Method	Description	Details
String	getConfirmMsg(String key)	Receiving a confirmation message	A function to get a confirmation message that corresponds to a message key
String	getConfirmMsg(String key, String[] params)	Receiving a confirmation message parameter	A function to get a confirmation message that corresponds to a message key in replacement of a parameter value

Input

- key: A key information recorded in a properties file
- params: A string information to be replaced
- Validation Check: [Validation check of the element technology](#)

Output

- String: If there is no corresponding property information for the key designated, null return is executed.

Environmental Settings

A message shall be defined in the ‘egovProps/conf/confirmmessage.properties’ file under the **User home** directory to process the message. The message is defined using the same method applied to define a general property.

- User Home Directory: It is information collected through ‘System.getProperty(“user.home”)’. In general, it is “C:\ Documents and Settings\ **User Account**” for the Windows OS, and “/home/**User Account**” for the Unix account.

Manual

First of all, assume that the following message is defined in the ‘confirmmessage.properties’ file.

```
test.message = confirm message
param.message = confirm message : { 0 } = { 1 }
importegovframework.com.utl.cas.service.EgovMessageUtil;
```

```
....  
String message = null;  
  
// Receive a general confirmation message  
message = EgovMessageUtil.getConfirmMsg("test.message");  
  
// Receive a parameter- processed confirmation message: The String value is { 0} and { 1} respectively.  
message = EgovMessageUtil.getConfirmMsg("param.message", new String[ 2] { "Confirm", "There is no  
expected value."});
```
