

# Interface Device API Guide Program

## Outline

Mobile Interface Device API Guide Program provides the developers with the guidelines of how to implement RESTful in data communication with the web servers built under eGov Standard Framework, using the runtime environment of Mobile Device API. 7

### Feature

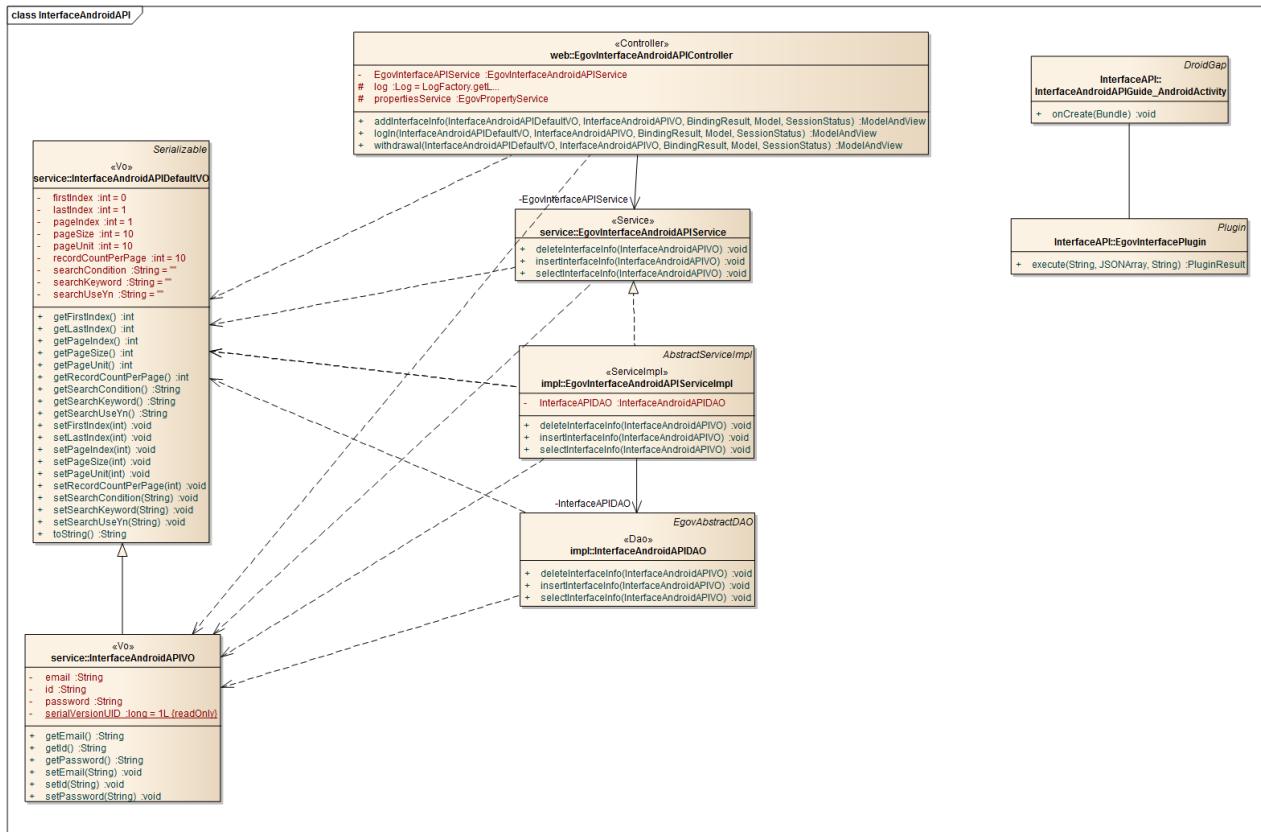

The Guide Program features **Send Data to Server**, **Receive Data in Device** and **Request Data Removal to Server**.

### Preconditions

Category	Description
Local Device Environments	eGovFramework Runtime Environment 3.5, Android SDKAPI 22(version 5.0 Lollipop)
Server-side Developmental Environment	Runtime Environment for eGov Standard Framework 3.5
Works in sync with Mash up Open API	N/A
Test Device	Galaxy S2
Test Platform	Android 2.3
Libraries Added	N/A
Restrictions	N/A

## Description

## Related Class Diagram

## Device Application

### Source

Type	Target Source	Remark
Activit	kr.go.egovframework.hyb.interface.InterfaceAPIGuide_A y ndroidActivity	Activity Class for InterfaceAPI Guide Program
CSS	assets/www/css/egovframwork/mbl/hyb/InterfaceAPI.css	Notable Cascading Style Sheets for InterfaceAPI Guide Program
IMAG E	assets/www/images/egovframwork/mbl/hyb/	Notable Images for InterfaceAPI Guide Program
JS	assets/www/js/egovframwork/mbl/hyb/InterfaceAPI.js	Notable JavaScripts for InterfaceAPI Guide Program
JS	assets/www/js/egovframwork/mbl/hyb/messages_ko.js	JavaScript for Validate Message Processing
RES	assets/www/res/	Notable Resources for InterfaceAPI Guide Program
XML	AndroidManiFest.xml	Configuration XML for Android
HTML	assets/www/InterfaceAPI.html	InterfaceAPI Main Page
HTML	assets/www/Intro.html	InterfaceAPI Intro Page

HTML assets/www/license.html	InterfaceAPI License Page
HTML assets/www/overview.html	InterfaceAPI Functional Description Page

### APIs Used

window.plugins.EgovInterface.get

- Request HTTP GET Method to the eGovFramework Web Server Application.

```
window.plugins.EgovInterface.get(URI, acceptType, params, successCallback);
var param = {pid:'egovmobile'};
window.plugins.EgovInterface.get("/mylist.do", "xml", params, function(xmldata){
    alert(xmldata);
});
```

Option	Description	Remark
URI	URL requested	See <b>Properties</b> for more information.
acceptType	Configure Accept-Type of HTTP Header	json,xml
params	Input Parameter	Input Json Object

successCallback Function returned when GET Method is successful. JSON or XML data processing by acceptType.

window.plugins.EgovInterface.post

- Request HTTP POST Method to the eGovFramework Web Server Application.

```
window.plugins.EgovInterface.post(URI, acceptType, params, successCallback);
var param = {pid:'egovmobile'};
window.plugins.EgovInterface.post("/mylist.do", "xml", params, function(xmldata){
    alert(xmldata);
});
```

Option	Description	Remark
URI	URL requested	See <b>Properties</b> for more information.
acceptType	Configure Accept-Type of HTTP Header	json,xml
params	Input Parameter	Input Json Object

successCallback Function returned when GET Method is successful. JSON or XML data processing by acceptType.

window.plugins.EgovInterface.geturl

- Get SERVER\_URL configured in the properties.

```
window.plugins.EgovInterface.geturl(successCallback);
window.plugins.EgovInterface.geturl(function(url){
    alert(url);
});
```

<b>Option</b>	<b>Description</b>	<b>Remark</b>
successCallback	Function returned upon success	String Type
Server Application		
<b>Source</b>		
<b>Type</b>	<b>Target Source</b>	<b>Remark</b>
Controller	egovframework.hyb.add.itf.web.EgovInterfaceAndroidAPIController	Classes for member information administration.
Service	egovframework.hyb.add.itf.service.EgovInterfaceAndroidAPIService	Service interface for member information administration.
VO	egovframework.hyb.add.itf.service.InterfaceAndroidAPIDefaultVO.java	VO Class for member administration.
VO	egovframework.hyb.add.itf.service.InterfaceAndroidAPIVO.java	VO Class for member administration.
DAO	egovframework.hyb.add.itf.service.impl.InterfaceAndroidAPIDAO.java	Data processing class for member administration.
DAO	egovframework.hyb.add.itf.service.impl.EgovInterfaceAndroidAPIServiceImpl.java	Class for processing services requested.
Query XML	X resources/egovframework/sqlmap/hyb/add/itf/EgovInterfaceAndroid APIGuide_SQL_mysql.xml	Query file for member information administration.

#### Related Tables

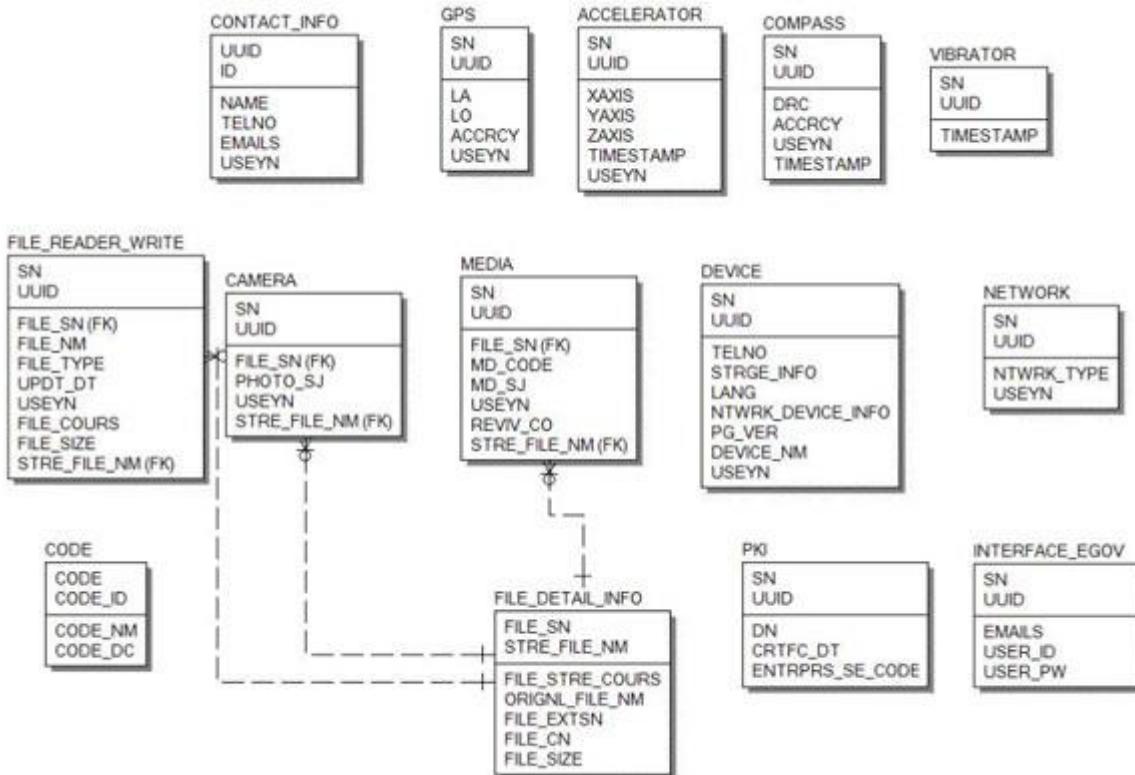

<b>Title</b>	<b>Table</b>	<b>Remark</b>
Interface(eGov) INTERFACE_EGOV	Administration of Interface(eGov) Information	

#### Tables Breakdown

- Interface(eGov)

No.	Column	Title of Column	Type	Length	Null	KEY
1	SN	Serial No.	NUMERIC	6	NotNull	pk
2	UUID	UUID	VARCHAR	50	NotNull	pk
3	EMAILS	Email	VARCHAR	50	Null	
4	USER_ID	User ID	VARCHAR	20	Null	
5	USER_PWD	User Password	VARCHAR	2000	Null	

## ERD

## Properties

Interface Device properties required for use of Interface-related functions of Accelerator Device API Guide Program are as follows:

Device Application

**res/xml/config.xml**

```
<!-- PhoneGap Plugin for eGov Interface Device API Class -->
<pluginname="EgovInterfacePlugin" value="kr.go.egovframework.hyb.plugin.EgovInterfacePlugin"/>
```

**res/values/serverinfo.xml**

```
<!-- Server Directory for eGov Interface Device API Class -->
<?xmlversion="1.0"encoding="utf-8"?>
<resources>
    <stringname="SERVER_URL">http://192.168.100.222:8080/DeviceAPIGuideTotal_Web_V1.7</string>
</resources>
```

**AndroidManifest.xml**

```
<uses-permissionandroid:name="android.permission.INTERNET"/>
<uses-permissionandroid:name="android.permission.ACCESS_NETWORK_STATE"/>
```

Server Application

**resource/egovframework/sqlmap/sql-map-config\_[DB NAME].xml**

```
<sqlMapresource="egovframework/sqlmap/hyb/add/dvc/EgovInterfaceAndroidAPIGuide_SQL_[DB  
NAME].xml"/>
```

## Related Features

The Guide Program features **Send Information Data to Server, Receive Information Data in Device and Request Information Data Removal to Server.**

Sending Information Data to Server

**Business Logic**

The membership information is sent out to the server to verify the response.

**Code**

```
var url = "/itf/xml/addInterfaceInfo.do";  
var acceptType = "xml";  
var userid = $("#signUpId").val();  
var userpw = $("#signUpPasswd").val();  
var emails = $("#signUpEmail").val();  
var params = {uuid : device.uuid,  
             userId: userid,  
             userPw: userpw,  
             emails: emails};  
$.mobile.showPageLoadingMsg('a');  
alert('Send Method:RESTful\n Send Type:POST('+ acceptType +')\nparam:' +  
JSON.stringify(params));  
  
// get the data from server  
window.plugins.EgovInterface.post(url, acceptType, params, function(xmldata) {  
    console.log('DeviceAPIGuide fn_egov_subscribe_member request Complete');  
    alert('Response Method:RESTful\n Response Type:POST('+ acceptType +')\nparam:' +  
xmldata);  
    $.mobile.hidePageLoadingMsg('a');  
    if($(xmldata).find("resultState").text() == "OK"){  
        window.history.back();  
    }else{  
        jAlert($(xmldata).find("resultMessage").text(), 'Error', 'c');  
    }  
});
```

**Related Screen and Implementation Manual**

Function	URL	Controller	method	Display (HTML)
Sending Information Data to Server	/itf/xml/addInterfaceInfo.do	EgovInterfaceAndroidAPIController	Xml	signUp

ID, PASSWD and E-Mail are used for input.

Click on Sign In to send the information data to the server.

Note, however, that you need to validate the input data. Error messages are out in the event of insufficient condition.

Signing-in: Provide ID, PASSWD and E-Mail to send the information data to the server and click on Sign in.

Back : Moves back to **Interface DeviceAPI Guide Program Menu**.

---

Receiving Information Data in Server

**Business Logic**

You can check the log-in is successful or not sending the log-in information to the server.

### Code

```
var url = "/itf/xml/logIn.do";
var acceptType = "xml";
var userid = $("#loginId").val();
var userpw = $("#loginPasswd").val();
$.mobile.showPageLoadingMsg('a');
var params = {uuid : device.uuid,
              userId: userid,
              userPw: userpw};
alert('Send Method:RESTful\n Send Type:GET('+ acceptType + ')\nparam:' +
JSON.stringify(params));

// get the data from server
window.plugins.EgovInterface.get(url,acceptType, params, function(xmldata) {
    console.log('DeviceAPIGuide fn_egov_login_member request Complete');
    alert('Response Method:RESTful\n Response Type:GET('+ acceptType + ')\nparam:' +
xmldata);
    $.mobile.hidePageLoadingMsg('a');
    if($(xmldata).find("resultState").text() == "OK"){
        window.history.back();
    }else{
        jAlert($(xmldata).find("resultMessage").text(), 'Error', 'c');
    }
});

});
```

### Related Screen and Implementation Manual

Function	URL	Controller	method	Display (HTML)
Receiving Information Data in Server	/itf/xml/logIn.do	EgovInterfaceAndroidAPIController	logInXm	InterfaceAPI.html#logIn

Click on "Log In" to send the information data to the server.

Note, however, that you need to validate the input data. Error messages are out in the event of insufficient condition.

Logging-in: Provide ID and PASSWD to send the information data to the server and click on "Log In"  
Back : Moves back to **Interface DeviceAPI Guide Program Menu**.

---

Sending a data delete request to the server

**Business Logic**

Provide the server with ID and PASSWORD in order to verify the deletion of user account.

### Code

```
var url = "/itf/xml/withdrawal.do";
var acceptType = "xml";
var userid = $("#" + secessionMemberId).val();
var userpw = $("#" + secessionMemberPasswd).val();
$.mobile.showPageLoadingMsg('a');
var params = {uuid : device.uuid,
              userId: userid,
              userPw: userpw};
alert('Send Method:RESTful\n Send Type:POST(' + acceptType + ')\nparam:' +
JSON.stringify(params));

// get the data from server
window.plugins.EgovInterface.post(url, acceptType, params, function(xmldata) {
    console.log('DeviceAPISample fn_egov_secession_member request Complete');
    alert('Response Method:RESTful\n Response Type:POST(' + acceptType + ')\nparam:' +
xmldata);
    $.mobile.hidePageLoadingMsg('a');
    if($(xmldata).find("resultState").text() == "OK"){
        jAlert($(xmldata).find("resultMessage").text(), '성공', 'c', function(r){
            if(r == true){
                window.history.back();
            }
        });
    }else{
        jAlert($(xmldata).find("resultMessage").text(), 'Error', 'c');
    }
});
```

### Related Screen and Implementation Manual

Function	URL	Controller	method	Display (HTML)
Sending a data delete request to the server	/itf/xml/logIn.do	EgovInterfaceAndroidAPIController	withdrawal	InterfaceAPI.html#secessionMember

Click on "Delete Account" in order to send a data deletion request to the server.

Note, however, that you need to validate the input data. Error messages are out in the event of insufficient condition.

**Deleting Account:** To send a data deletion request to the server, input ID and PASSWORD, then click on the "Delete Account."

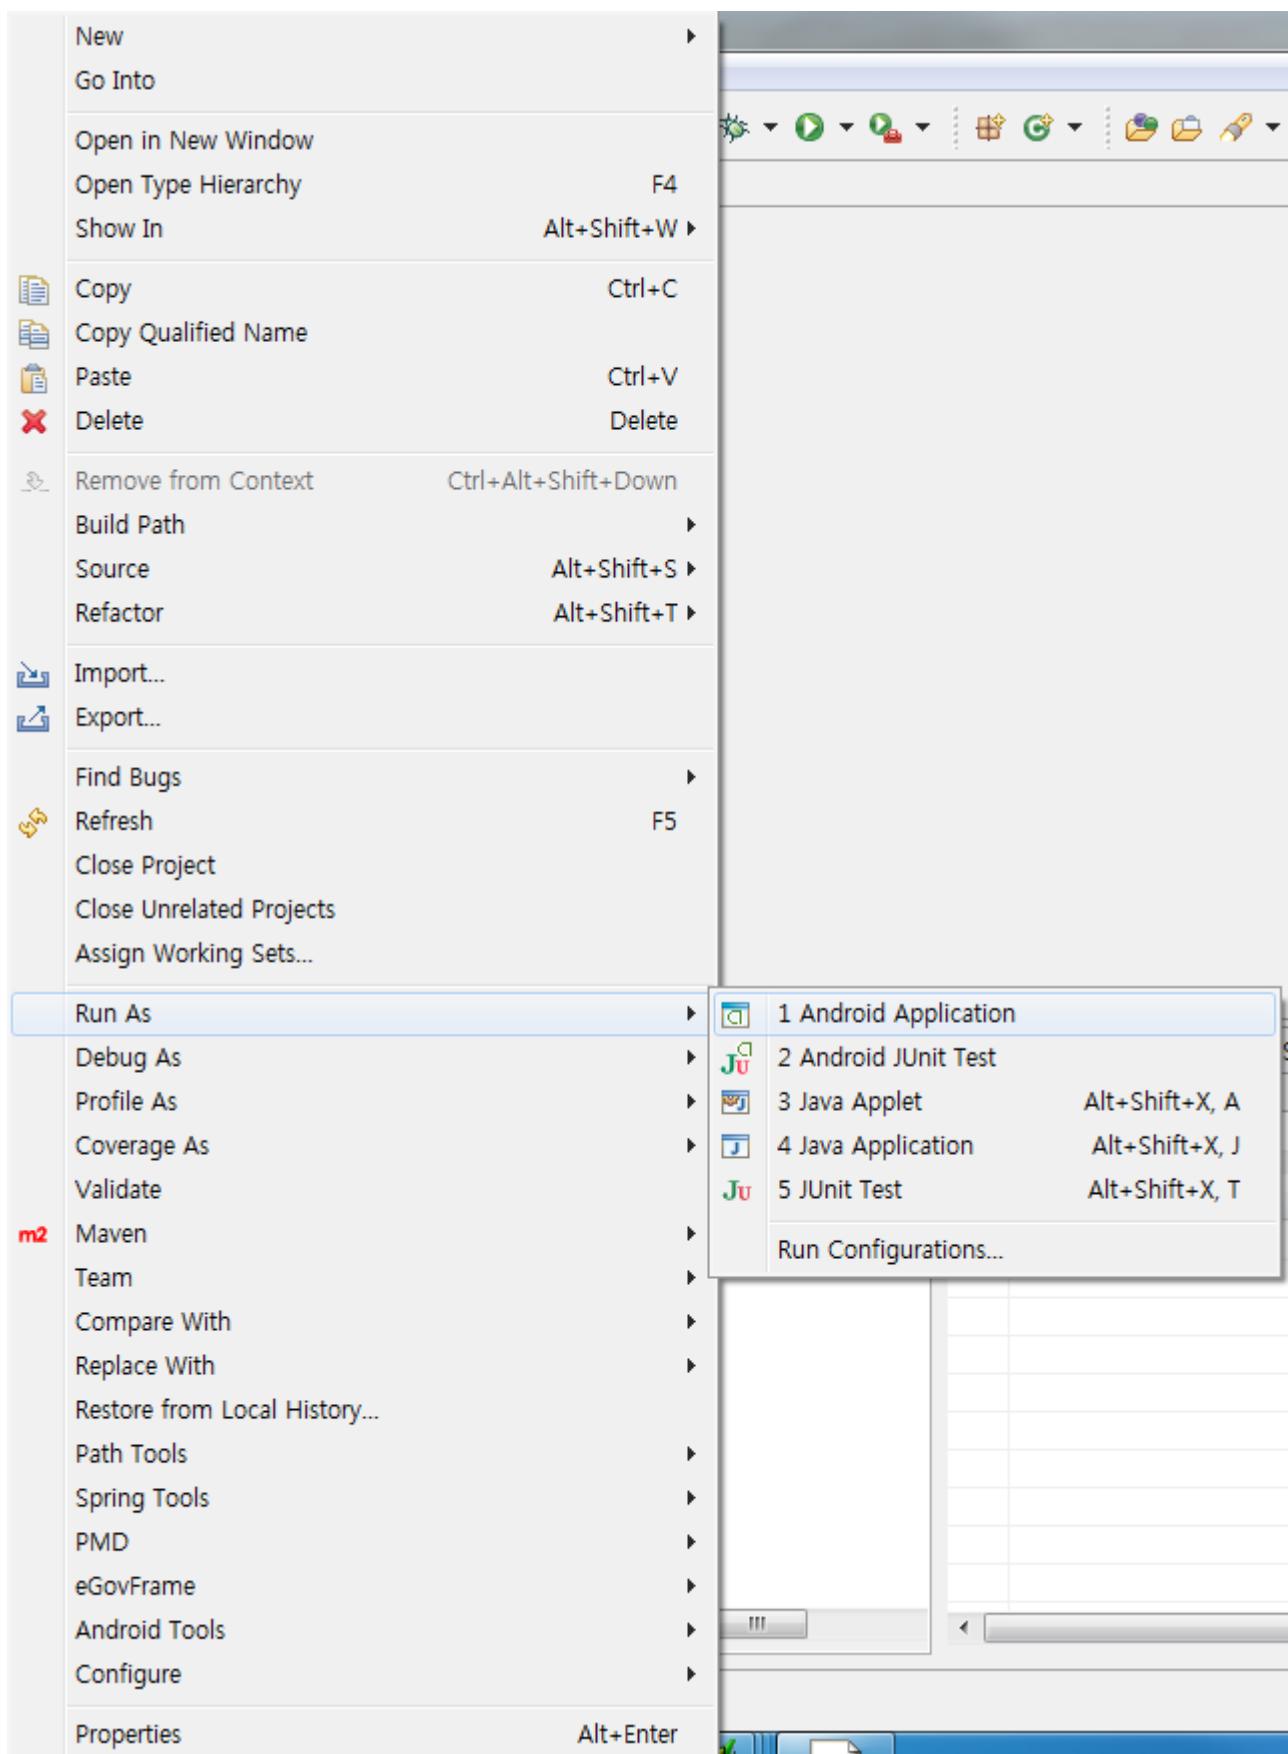

**Back :** Moves back to **Interface DeviceAPI Guide Program Menu.**

## Compiling, debugging, distributing

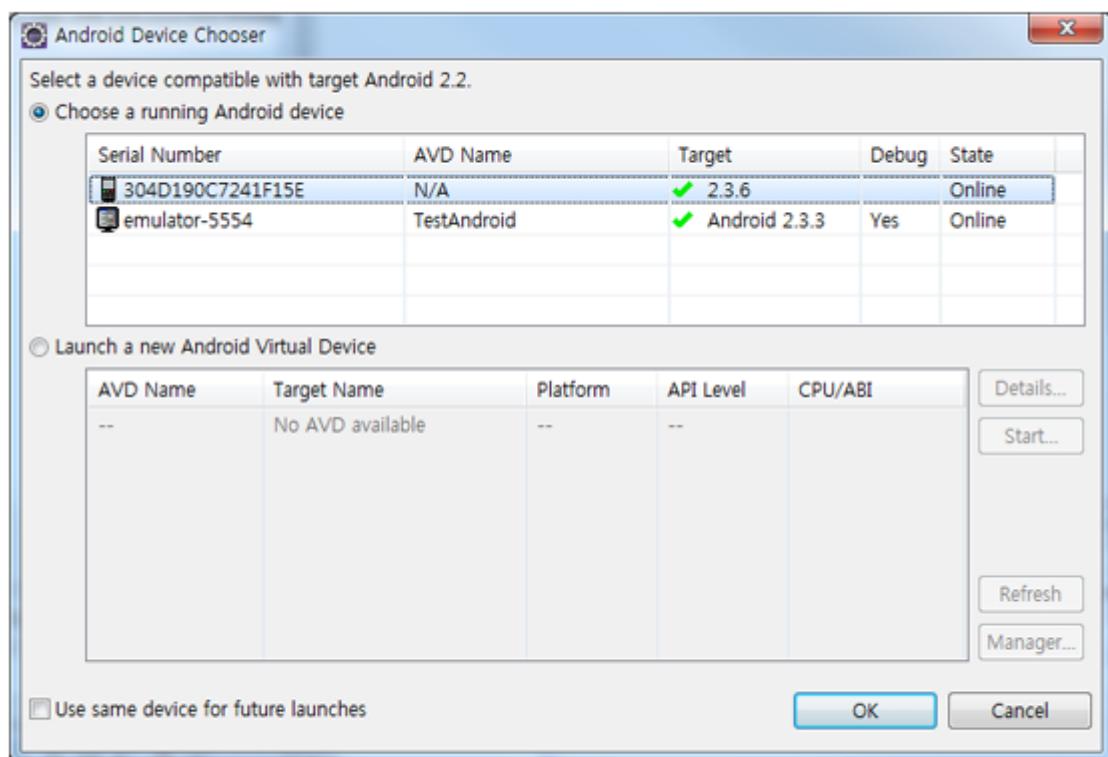

## Compiling

### **How to compile "InterfaceAPI Device Applicaton"**

- Right-click on the Device API Guide(Android) project, and click on the "Android Application" at the "Run As" tab. The guide program will be built and installed into the Android device.

- When “Android Device Chooser” window appears, select appropriate device and click on the "OK" button.

- Program display on the emulator

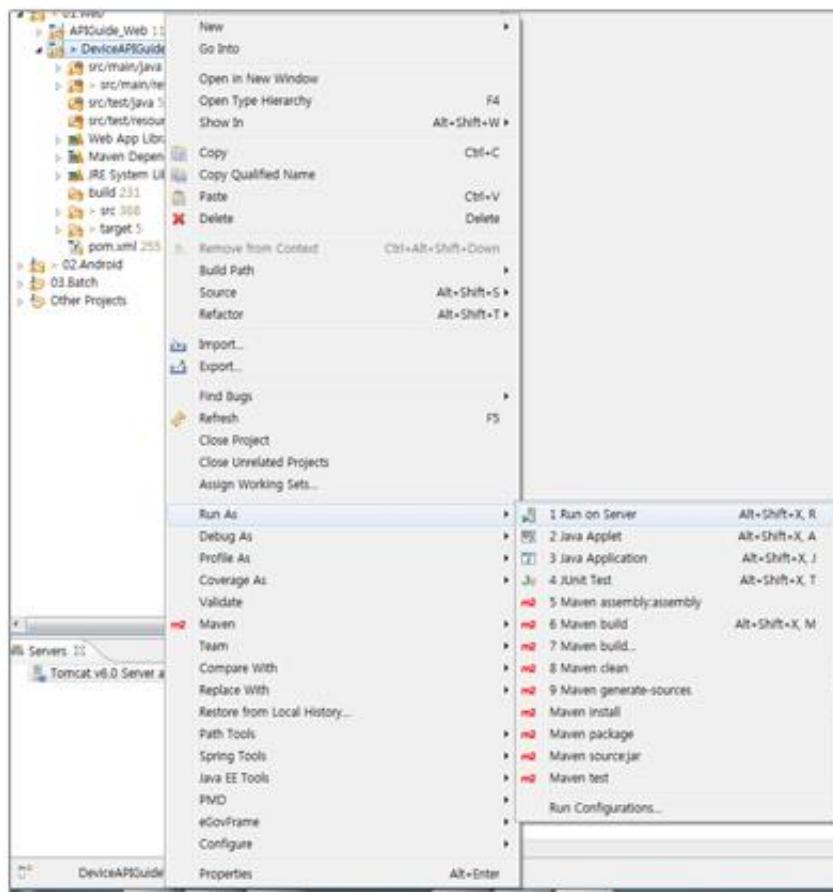

- Program display on the device

#### How to compile "InterfaceAPI Server Application"

- Right-click on the project and click on Run As>Run On Server in order to run the InterfaceAPI server-side Guide Program.

- When the build is successfully completed, a message reading 'Server Startup in xxx ms' will display on the console window on the Eclipse.

```

```

#### Debugging

Use console.log in order to check the details on any errors on the device application, and to conduct debugging. Debug codes in console.log are available in JavaScript syntaxes that you can use in Eclipse.

See the following for how to code console.log:

```

function fn_egov_subscribe_member() {
    var url = "/itf/xml/addInterfaceInfo.do";
    var acceptType = "xml";
}

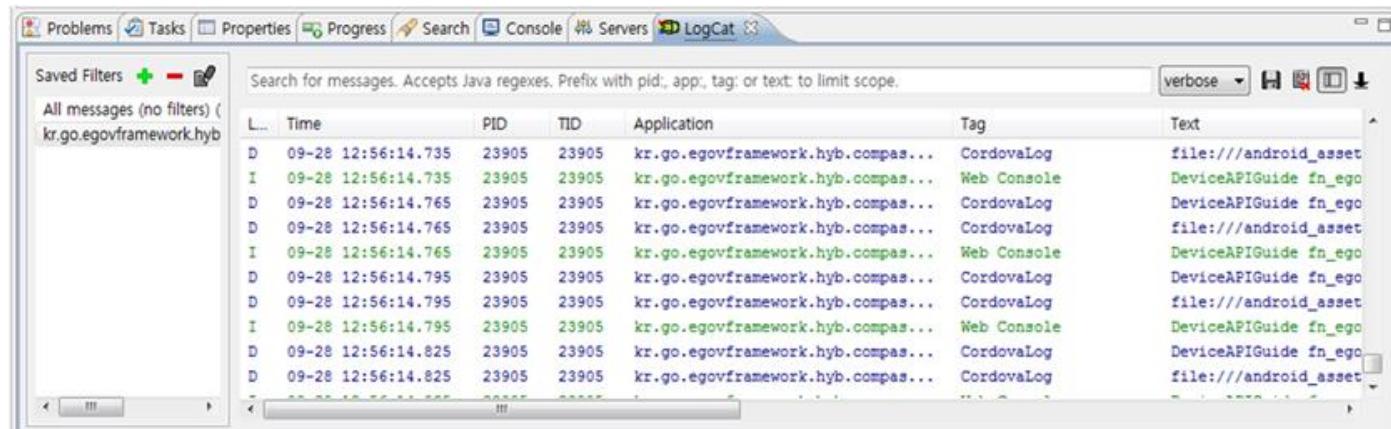

```

```

...
window.plugins.EgovInterface.post(url, acceptType, params, function(xmldata) {
    console.log("DeviceAPIGuide fn_egov_subscribe_member request Complete");
    ...
}
...
}

```

When the debugging code is executed, check out the following console message appears:

Interface device API Guide Program will output the following console information for debugging.

Debug code	Debug information
DeviceAPIGuide fn_egov_login_member request Complete	Receive to information data device successful
DeviceAPIGuide fn_egov_subscribe_member request Complete	Send to information data device successful
DeviceAPIGuide fn_egov_secession_member request Complete	Data deletion request to server successfully processed
DeviceAPIGuide EgovInterface.get request Fail	HTTP GET Method request failed
DeviceAPIGuide EgovInterface.post request Fail	HTTP POST Method request failed
DeviceAPIGuide EgovInterface.geturl Fail Distribution	geturl function request failed
